DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-7 and 19-21, drawn to system/method for enforcement of written software licensing, classified in class 705, subclass 59.
- II. Claims 8-18, drawn to a hardware ID for identifying a plurality of components of a computer system, classified in class 705, subclass 56.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as enforcement of written software licensing terms via a product ID and a hardware ID. Invention II has separate utility such as identifying the plurality of components of a computer system. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
